custom watches and private labels

S/N	Probable Grade	Additional Notes
none (25392)	J. Watson	1st series click and oblong ratchet bridge; top plate does not encircle barrel; brass wind guard cup; #216 potance; peep holes; #92 stamped vertically (2 above 9) on pillar plate and under top plate; #2 under cock; OF T&S silver case 1861 with eagle, indian and star hallmarks; features match Watson grade and S/N Ledger [r1] lists this movement as Nameless Ordered Movement with steel balance (2nd run Watson would not likely have 1st series click).
170	S. Curtis	#70 stamped on pillar plate; ratchet bridge part number 208 in 1885 Materials Catalog; no peep holes; parts look identical to SC #212 except it has stop works like that on Warren #44; rationale for grade: placement of S/N on barrel bridge, style of the engraving of "No." and signature, also F & S on index are not spelled out like they are on Warren.
241	S. Curtis	Private label from W.H. Calhoun of Nashville, TN; no mention if signature is on dial, plate or both.
1000	PSB	N.S. Daniels; top plate encircles barrel; steel wind guard; Arabic dial signed American Watch Co.
1859	AT&Co	Charles M. Fisher; double sunk dial; #63 on pillar plate, no # under top plate as expected with S/N on top plate. The toe-end escape wheel, SO balance, and S/N on top plate dates this watch as probably made in 1859 (=S/N); also, the top plate does not encircle the barrel which is consistent with late 1859. The barrel bridge is highly engraved. Name on dial looks erased. No stop works.
1871	WWCo	#1871 might be for year made which was when stem winding was introduced for Model 57s according to Reference [r1]; female stem wind/lever set with let-down screw
1878		Pierce. O Connell.; #1878 is probably year made, no other numbers are on damaskeened nickel movement; "Adjusted"; female SWLS w/o let-down screw
6064		F.B. Adams
6522	AT&Co	George B Ward, Hillsborough, N.H.; jewel count unconfirmed but Reference [r1] indicates it has center jewel
6528	AT&Co	J.P. Capella, St. Louis Mo.
6531	AT&Co	The upper plate is inscribed "J.P.Capelle." The barrel bridge is inscribed "St.Louis, Mo."; The single sunk dial is signed, "J.P.Capelle, St.Louis, Mo."; hands are Fleur-de-Lis; 1st series click and oblong ratchet bridge; subassembly number '31' stamped on pillar plate; OF coin silver case 8636 and is stamped with an eagle in the rear cover with the term "coin" stamped above the eagle (view appears to be from eagle's back facing its left).
6534	AT&Co	private label B. Stevens on top plate and dial; gold hands; So. Danvers Mass on barrel bridge & dial; top plate = 42.7 mm, pillar plate = 45.7 mm; cantilevered 1st series potance #215 illustrated in "Waltham" 1885 Materials catalog; 1st series click and oblong ratchet bridge; subassembly number '34' stamped on underside of top plate, on pillar, and under hr/min whls; 2 1/2 oz warranted silver coin OF no name case #78, "PAT NOV.9.69. JAN.18.70 JULY 28.74" stamped on interior ring of case
6584		Clark Bros

16806	PSB	Serial Number Ledger reference [r1] lists batch 801-820 as nameless, must be PSB grade with 7J & S/N; Clark & Brothers Rutland, VT on dial; Clark & Brothers on top plate, Rutland, VT on barrel bridge.
16817	PSB	Serial Number Ledger reference [r1] lists batch 801-820 as nameless, must be PSB grade with 7J & S/N; 17 stamped under top plate and on pillar plate; top plate 42.7mm & 1mm thick, pillar plate 45.7mm; signature on top plate is A. L. Dennison! Engraving is unique style compared to standard movements, especially on the barrel bridge (similar in style to the DH&D).
25318	PSB	Signed "Sam ¹ B. Young, Laconia N. H." on dial and movement; A.T. &C ^o . open face case 8681; The Serial Number Ledger [r1] lists movement in a batch 25311-25320 made February 1860 with "4 holes" (11J) and gold balance; also as "nameless ordered movements".
